PREVENTATIVE HEART SCREENING

WHY GET A HEART SCREENING

Prevention is the only cure for Sudden Cardiac Arrest.

- A stethoscope detects less than 95% of all heart conditions
- 1 in 300 youth having an undetected heart abnormality that puts them at risk for SCA
- A preventative heart screening provides a baseline of heart health
- All children and young adults ages 10-25 should be screened every other year or sooner if symptoms present

WHAT DOES IT INCLUDE

Heart screenings are painless. The screening includes:

- **On-line Registration and completion of heart health questionnaire and consent**
- **Height and Weight Measurement**
- **Blood Pressure Reading**
- **ECG - Traces the electrical activity/rhythm of the heart**
Conditions that could be identified include:
 - Non-specific ST wave changes
 - Long QT Syndrome
 - Wolf Parkinson White (WPW)
 - Left ventricular hypertrophy (LVH-ruled out by ECHO done after ECG)
